Introduction

Deliverables management

- **Introduction**
- The different types of deliverables
- Creating deliverables
- Customizing a deliverable
- Customizing pages
- Copy and/or update a deliverable
- Managing statuses
- Clipping drawings in deliverables

The deliverable management interface allows you to create and customise different types of deliverable.

A deliverable is a succession of pages covering all or part of the project. It may consist of several phases, or daily, weekly, monthly or customised schedules; it may also be a complex deliverable, combining phases and time zones of the project.
