Project and Gantt properties

Options menu

This window allows you to set up various properties for your project.

"Project properties" tab

You can change the general properties of your project, in particular rename it and change its start and end dates:

In this tab you can also set the prefix for tasks, the date format, the default units, and choose the behavior in case of a change in the calendar for an task (date or duration adjustment):

Finally, you can change the default colors for the different statuses:

Gantt chart settings tab

Default bars

Here you can change the appearance of the Gantt bars: text color, line height and margins.

Custom links

You can change the default color of link types:

- “Default”
- “Critical path”
- “Not scheduled”

You can also define your own link categories:
