Areas/axes/objects missing from the phasing book

“I don't understand, I've imported my drawings, the tasks that are well associated with the areas, and yet nothing appears in the phasing books.”

1/ Check the drawing used in the phasing book.

2/ Verify that the representations of areas/axes and the connected objects have been duplicated on this drawing (in the Create phasing interface).

3/ Verify that there are one or more tasks associated with this area/axis/object.

4/ Verify that the task dates correspond to the dates of the boards.
